

AJITHKUMAR V

Full Stack Developer | Java · React · Spring Boot · Node.js · MongoDB

Chennai, Tamil Nadu | ajithkumar1891999@gmail.com | +91 8610173747

GitHub: github.com/Ajith-1809 | LinkedIn: linkedin.com/in/ajithkumar-v-1318441aa | Portfolio: ajith-hosting.web.app

PROFESSIONAL SUMMARY

Motivated entry-level Full Stack Developer with freelance experience delivering production-grade web applications using React.js, Java Spring Boot 3.x, Node.js, PostgreSQL, and MongoDB. Built and deployed two HR Management Portals (Spring Boot + Supabase and Node.js + MongoDB Atlas) with JWT authentication, role-based access, real-time analytics, and multi-cloud deployment (Firebase + Render). Skilled in RESTful API design, Spring Security, cloud deployments, and responsive UI development. Actively seeking a full-time role in Tamil Nadu.

TECHNICAL SKILLS

Languages: Java (JDK 17), JavaScript (ES6+), SQL, Python (Basic)

Frontend: React.js (v18), Vite, Material UI, Tailwind CSS, Framer Motion, Recharts, Chart.js, Lucide Icons, HTML5, CSS3, Bootstrap

Backend: Spring Boot 3.x, Node.js, Express.js, Django (Basic), REST APIs, JWT, BcryptJS, Spring Security, Spring Data JPA, Hibernate, Maven

Databases: MySQL, PostgreSQL (Supabase), MongoDB Atlas, Microsoft SQL Server, Oracle, Firebase Firestore

Cloud & Hosting: Firebase Hosting, Render, Supabase, Google Cloud, AWS (Basic), MongoDB Atlas

Tools: Git, GitHub, Postman, VS Code, Canva

Concepts: SDLC, Role-Based Access Control, Audit Logging, Real-time Analytics, PDF Generation (jsPDF), Microservices (Basic)

FREELANCE EXPERIENCE

Full Stack Developer (Freelance) | **Independent / Client Projects** | Remote · Tamil Nadu 2023 – Present

- Designed and delivered 4+ complete web applications end-to-end — from client requirement gathering and database design to UI, API development, and cloud deployment
 - Built and deployed an HR Management Portal with JWT authentication, role-based access control, real-time analytics, and audit logging — hosted live on Firebase + Render + MongoDB Atlas
 - Built a billing and inventory system for a local retail client, replacing manual processes and reducing billing time by ~60%
 - Implemented multi-cloud deployment strategies: Firebase Hosting for frontend CDN, Render for backend API hosting, MongoDB Atlas for cloud database
 - Integrated third-party APIs: WhatsApp API for automated bill sharing, weather APIs for live data, jsPDF for invoice generation
 - Delivered all projects independently with strong client communication, version control (Git), and on-time delivery
-

PROJECTS

HR Management Portal (Node.js Edition) — *React 18 · Vite · Recharts · Lucide · Node.js · Express · JWT · BcryptJS · MongoDB Atlas*

GitHub: github.com/Ajith-1809/node_js-backend

Live: ajith-nodejs-hr-portal.web.app | API: node-js-backend-3l5m.onrender.com

- Built a full-stack HR portal with JWT-based authentication, Admin and User role-based access control, and BcryptJS password hashing
- Implemented real-time analytics dashboard: Department Distribution, Gender Diversity, and Employee Status charts using Recharts
- Developed complete Employee CRUD with smart validation (18+ age check, duplicate detection) and comprehensive audit logging for all admin actions
- Deployed on multi-cloud infrastructure: Firebase Hosting (frontend CDN), Render (backend Node.js API), MongoDB Atlas (cloud document store)
- Built glassmorphism UI with smooth animations, fully responsive across mobile, tablet, and desktop

HR Management Portal (Spring Boot Edition) — *React 18 · Vite · Context API · Spring Boot 3.x · Spring Security · Spring Data JPA · Hibernate · PostgreSQL (Supabase) · JWT · Maven*

GitHub: github.com/Ajith-1809/java-springboot

- Built an enterprise-grade HR portal with Spring Boot 3.x backend, JWT-based authentication, and role-based access control (Admin/User) using Spring Security — deployed live on Render (backend) + Firebase (frontend) + Supabase PostgreSQL (database)
- Implemented Spring Data JPA / Hibernate for data access with PostgreSQL (Supabase), supporting full employee lifecycle CRUD, profile picture uploads, and detailed employee dossier management
- Built real-time audit logging to automatically track all admin actions for transparency and security compliance; structured backend with clean service-repository-controller architecture
- Built React 18 frontend (Vite) with glassmorphism design, React Hooks & Context API for state management, and Fetch API with interceptor patterns — fully responsive across desktop, tablet, and mobile

E-Commerce Administration Dashboard — *React.js · Vite · Material UI · Framer Motion · Chart.js · Spring Boot · Hibernate · MySQL · Maven*

GitHub: github.com/Ajith-1809/e-commerce-dashboard

- Built a full-stack admin dashboard with real-time revenue, order, and customer analytics directly from the MySQL database via REST APIs
- Implemented multi-currency support (INR, USD, EUR, GBP, JPY) with instant global switching, and PDF invoice generation with GST/Corporate/Standard templates
- Built complete inventory and order lifecycle management (Pending → Processing → Shipped → Delivered) with Customer CRM
- Designed glassmorphism UI with Framer Motion animations, fully responsive across all devices

E-Store Stock Inventory Application — *React.js · Node.js · MySQL*

- Built a billing and stock management system for an actual retail client — currently in active use
- Implemented PDF bill generation and WhatsApp bill sharing via APIs, reducing manual billing time by ~60%
- Built inventory tracking with low-stock alerts and full sales history via MySQL

Weather Application — *React.js · REST API · JavaScript*

GitHub: github.com/Ajith-1809/Wheather-app

- Built a real-time weather app with dynamic environmental backgrounds, interactive data visualization, and condition-based UI theming
- Integrated a third-party weather API for live city search with fully responsive layout

Traffic Sign Detection & Recognition System — *Python · TensorFlow · Keras · OpenCV*

- Developed a CNN-based deep learning model for real-time traffic sign classification using OpenCV and benchmark datasets

EDUCATION

B.E. – Computer Science Engineering

2021 – 2024

University College of Engineering, Pattukkottai (Anna University) **CGPA: 7.78**

Diploma – Mechanical Engineering

2017 – 2019

Chendhuran Polytechnic College, Pudukkottai **CGPA: 9.0**

CERTIFICATIONS

- **Java Programming Certification** — Oracle / NPTEL (2023)
 - **Data Analytics with Tableau** — TNSDC & SmartBridge (2023)
 - **Network Engineering** — TNSDC & Cisco (2022)
-

ADDITIONAL INFORMATION

Strong problem-solving skills · Quick learner · Team player · Open to Day / US / UK / Rotational shifts ·
Willing to relocate across Tamil Nadu · Minimum expected CTC: ₹3.5 LPA
